

Third Party Logistics (3PL)

WMS FOUNDATION

A robust, feature rich WMS sits at the heart of our solution. Capabilities such as catch weight, advanced inventory allocation and many more

CLIENT PROCESS ASSURANCE

Mapping the needs of individual clients to customizable inventory attributes, workflows, entity design, alerts, notifications and much more.

ENTERPRISE REVENUE ASSURANCE

Ensuring that each client is billed in an accurate and timely fashion based upon customizable rates and activity based revenue and costing. Then billing, invoicing and integrating with your financial system completes the process.

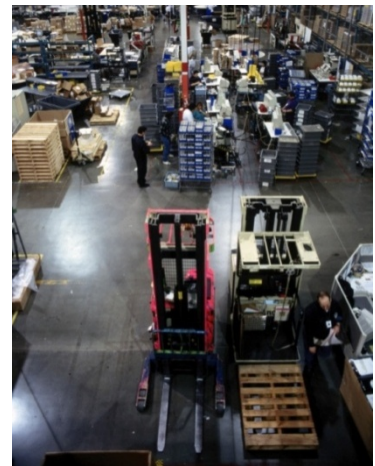

WORK WITH THE SPECIALISTS

Unlike many solutions in the market, Accellos One Third Party Logistics (3PL) was designed from the ground up to support the unique needs of the 3PL marketplace. For example, effectively handling multi-client billing and workflow isn't an afterthought – it is an intrinsic part of the system from the design of the data forward.

Accellos One 3PL is designed to manage all aspects of your warehouse, from managing inventory on the warehouse floor to tracking and controlling customer deliveries. With Accellos One 3PL, you can be sure you're your warehouse is always performing at peak efficiency.

Engineered to meet the unique needs of third party logistic operators, Accellos One 3PL provides streamlined warehouse management processes, such as automated document management and delivery, advanced labor analytics, industry reporting, workforce automation, vendor compliance compatibility, and on-demand enterprise self service visibility.

Accellos One 3PL brings you the latest innovations in cost control, revenue management, and inventory services, enabling you to consistently manage your business and help you meet your deadlines while exceeding customer expectations.

“Accellos One 3PL has special features of allocation methods, configurable inventory attributes, engineered labor standards, and the customer service management that can benefit any logistics provider. Accellos is an athlete in supply chain execution.”

*Phil Obal, Principal
Industrial Data & Information, Inc.*

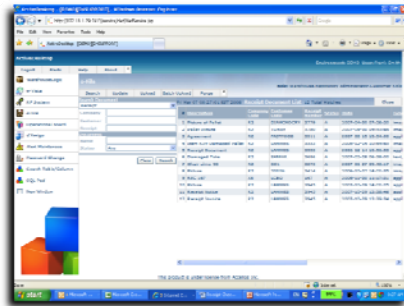

ADVANCED LABOR PLANNING & ANALYTICS

Empower your workforce with the right tool for the job – utilizing RF, Voice, RFID or paper in your warehouse processes. Then use advanced technology to assist in labor forecasting, tracking and costing (by both client and employee).

ENTERPRISE SELF SERVICE

Differentiate your company by providing web visibility to your clients, their customers and your partners into key processes that enable them to run their businesses more effectively.

Benefits of Accellos One 3PL

WITH ACCELLOS ONE 3PL YOU CAN:

- Manage each client's unique needs with varying levels of automation while operating concurrently within a single facility
- Streamline operations through flexible document production and delivery
- Leverage real-time information and advanced process management capabilities necessary for peak performance in 3PL operations
- Be more productive while reducing labor costs and increasing customer service

Why Accellos One?

The 3PL industry is a dynamic environment with varying degrees of complexity caused by multiple clients operating in a single facility. Accellos One 3PL provides users with the capability to operate a profitable business with a single set of technology, facilities, manpower and material handling equipment.

And, Accellos offers a premier suite of supply chain execution solutions enabling you to fulfill all of your needs from a single source.
