EMPOWERING THE WAREHOUSE

If your company is like most, the warehouse is where the action is. It holds your single largest asset. And, it holds the keys to your overall customer satisfaction.

It is not a simple spot to store inventory anymore. Your customers, vendors and partners are placing increasing demands upon you. They're looking for special packaging and handling, unique labeling to meet their requirements, electronic visibility into product movement and a limitless variety of other specialized requests.

At the same time, you're trying to do more with less. Tighten control on your inventory. Avoid shrinkage. Maximize the utilization of your labor force. Improve the accuracy of your shipments.

Seems impossible sometimes – especially when the only solution is complex software that might be more than your company can consume.

Accellos can help. We've built our Collect Edition to be that special blend of simplicity and sophistication that can enable your company to accomplish both of your goals – providing excellent customer service and controlling your overall costs.

“Most companies today struggle to achieve true efficiency in their warehouse operations. For many companies it is a fight to just get the right product out of the door on time.”

More Than Data Collection

Many companies begin their life in the warehouse with a set of basic automated data collection tools. And, unfortunately, never fully achieve their potential because of the difficulty in moving from the base tools to a full warehouse management system. The Collect Edition presents a different approach. It offers the first time user a blend of the sophistication of a warehouse management system with the simplicity of an automated data collection solution. And, it is a member of a family of warehousing solutions that allows the sophistication and functionality in your warehouse to grow as your company's demands increase.
