Solution supports the continued growth and flexibility that today's small and midsize businesses demand and is tailored for companies that require a business system with a high degree of industry-specific functionality.

- **Rapid, Cost-Effective Implementation –**

Preconfigured solution that offers a rapid implementation, predictable cost of ownership, allowing you budget in advance and eliminate the risk of hidden or add-on costs.

- **Increase Profitability, Advanced Levels Of Control For Small And Midsize Businesses –**

Improve visibility into financial processes and overall performance allowing you to stay on top of your business and grow profitability.

- **Improve Corporate Performance –**

Quickly read, evaluate, and respond to changing business conditions with effective business strategies – such as defining financial targets, monitoring costs and revenue during execution.

## SOLUTION BRIEF

## Integrated. Scalable. Powerful

Successful businesses know that having access to key financial information and reports is critical to your success. So why not start with the best! Let SAP financials be the core building block of your ERP system. Built on a scalable, open architecture, SAP Financials can be easily integrated with your sales, manufacturing, human resources, CRM, and distribution solutions allowing you to leverage your existing infrastructure investment.

## Proven Value

Emergys, in partnership with SAP, has developed a pre-configured SAP® Financial solution called **Finance 360°**. With **Finance 360°**, you will have a fully configured enterprise-class financial solution up and running within **4 weeks** allowing your business to go to the next level by leveraging SAP's scalability, reliability and best practices. The solution offers depth of functionality in accounting, reporting, analysis, financial supply chain, and treasury management. Robust financial and management reporting, plus internal controls and documentation of all financial processes and transactions, ensures the highest levels of business analysis and governance.

**Finance 360°** sets the stage for future innovation with a stable and committed software business partner. Our solution fits your business by allowing you to begin with base financials and over time as you grow, so will SAP grow with you.

## SOLUTION BRIEF

# Finance
